

## ORGANIC PRODUCER ENDORSEMENT

I, the undersigned, affirm the following:

- I affirm that all land used by me for organic crop production has had no prohibited substances (as defined by the National Organic Program) applied to it for at least 3 years prior to harvest. Prohibited substances include sewage sludge, non-compliant herbicides, pesticides and fertilizers.
- I affirm that all agricultural products, including livestock, processed and handled products, for which organic certification is requested, have been produced according the USDA National Organic Program (NOP) Standards.
- I affirm that the information provided in the organic system plan (application and associated forms) is complete and accurate and understand that MOFGA Certification Services LLC (MCS) relies upon this information for its organic certification process. Willfully providing false information may result in the denial of certification and may be subject to legal action and penalties under state and federal law. If any of this information changes, I (we) will notify MCS of these changes promptly.
- I understand that my operation may be subject to unannounced inspection and/or sampling at any time as deemed appropriate to ensure compliance with the NOP regulations.
- I agree to give MCS access to all facilities and records that provide information about the operation and its compliance with the organic rule.
- I have read the National Organic Rule and MOFGA's Practice Manual and understand them.
- If certified, I agree to represent such agricultural and processed products as MOFGA Certified Organic only if I have abided by the current organic standards and continue to do so.
- I understand that MCS must keep my certification files for 10 years and that they are subject to USDA NOP audits.
- I permit MCS to provide marketing information, as indicated by me on the certification forms, to interested buyers or other parties.
- I will maintain all records applicable to the organic operation for no less than five (5) years beyond their creation. This includes keeping a copy of my annual certification paperwork.
- If I was not in control of land during the prior 36 months and I use this land in my organic farm plan, I understand that the person who was previously in control must sign an verification. This document as well as a field history and map must be submitted before this land can be evaluated for certification.
- I will not misuse the MOFGA Certified Organic logo.
- I affirm that I am an appointed representative of the operation and I can make decisions involving this organic system plan. I am an official contact for this operation.
- I understand that acceptance of organic system plan paperwork does not constitute certification. Certification is granted by the issuance by MCS of an organic certificate and an annual product verification document. I understand that the organic certificate is good until surrendered, suspended or revoked.

The undersigned must be 18 years or older. This document must be signed in order for MCS to proceed with the certification process.
